# Tx Power Generators

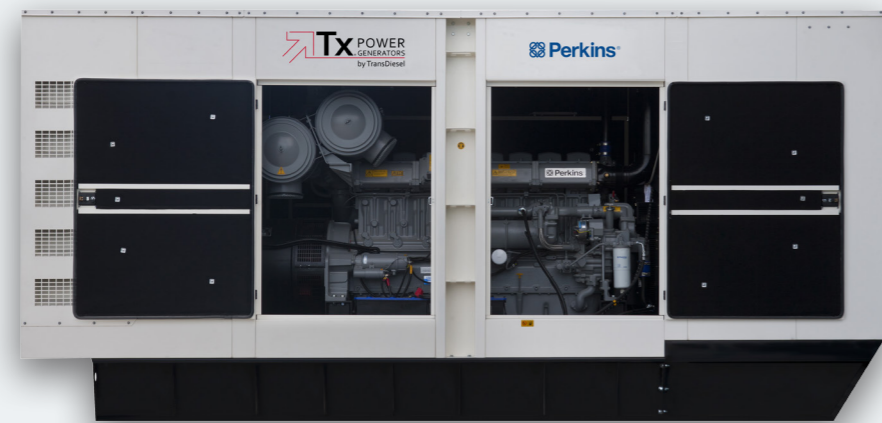

Tx Power Generators are diesel-fuelled with outputs ranging from 10kVA to 700kVA @ 50 HZ, they are manufactured complete with an electronic control panel, on-board battery chargers and water jacket heaters.

Tx Power Generators are designed specifically for all standby applications in situations such as: manufacturing, hospitality, health care, government, data centres, telecommunications, petrochemical, agriculture and more.

Tx also offer an extensive range of accessories including non-standard silencers, enclosures, long range fuel tanks and Automatic Transfer Switches.

## GENERAL SPECIFICATIONS

- European built
- Perkins powered
- 10kVA - 700kVA
- Comprehensive 12 month warranty
- Modular enclosures
- Battery charger
- Water jacket heater
- Heavy Duty air filtration
- Centre lifting points
- 18-24 hour fuel tanks standard for most models
- Single bearing class H 4-pole alternator
- Datakom microprocessor controller
- Low coolant alarm
- Low fuel alarm
- Oil drain pump
- Auto start
- Can be ordered with ATS within enclosure
- Battery, oil and coolants fitted
- Full handbook and operation instructions

## DKG-309 Generator Controller

The Datakom DKG-509 controller is a comprehensive AMF unit for single genset standby or dual genset mutual standby operations.

Features:

- 7 configurable digital inputs. Each input is fully configurable with selectable names, alarm type, polling, latching and contact type.
- Engine analog inputs are provided for coolant temperature, oil pressure, oil temperature and fuel level.
- The Datakom controller provides 2 relay and 4 semiconductor outputs.
- The Datakom controller records last 100 events with date-time stamp and a total of 18 measured parameters.
- The Datakom controller supports Telemetry and remote programming.

## TRANSDIESEL SERVICE

- TransDiesel provides comprehensive parts and service back-up for Perkins Diesel Engines.
- Mobile Field Service Technicians
- 24 hour After Sales and Service available
- Full Service Contracts available
